An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Moore on 27 June 2005.

The application has been amended as follows:

Cancel claims 5 and 7.

These claims are being canceled since the subject matter of claim 5 is also present in claim 1, from which it depends and claim 7 is dependent on cancelled claim 3.

The following is an examiner's statement of reasons for allowance:

While the additions of CaO and SiO₂ are known to increase the resistivity of ferrites, such as those in U.S. patent 6,461,531, this patent teaches that the presence of more than 0.2 mass% CaO and more than 0.05 mass% SiO₂ lead to abnormal grain growth which degrades the magnetic properties of the ferrite. Applicants have unexpectedly found that the claimed composition has the increased resistivity but no abnormal grain growth, which would have been expected with the claimed amounts of CaO and SiO₂. Thus the claimed ferrite composition is allowable over that taught in the cited art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
